

The BRIDGE Lab: Bridging the «Wisdom Gap»

Summary

In The BRIDGE Lab, DSI researchers aim to create a collaborative platform as a structural vessel to promote research and innovation across sectors and cultures, by connecting science with business, cultures, and society more broadly.

Context

Today, we live in a world of interconnected global issues of great complexity. While the scale and magnitude of the global issues are accelerating and growing ever more complex, our ability to comprehend these challenges and respond accordingly across all sectors is not matching pace. **The gap between the increasingly interconnected complexity of our problems and our inability to make sense of them is the «wisdom gap».**

Vision

The BRIDGE Lab offers an exploratory space to bridge the «wisdom gap» by addressing the challenge of «value sensitive innovation» through its strategically defined service portfolio. The ethos of the lab is to **smoothen the path and support different societal actors with better acceptance of, and adaptation to, emerging technology of high impact**. In the long run, the outcomes of the lab activities will help local authorities to strengthen the competence profiles and to enhance the attractiveness and competitiveness of the Greater Zurich Area as a unique hub for innovation.

Project Duration

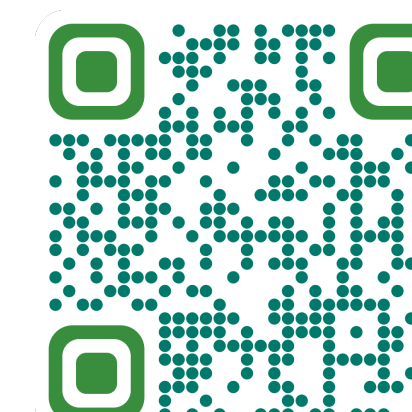

01.07.2022 – 30.06.2024
